

Step 1: Sign Up for GitHub as a Student

1. Visit GitHub's Education Page:

- Go to [GitHub Education](#).

2. Click "Get Benefits":

- On the GitHub Education homepage, click the **"Get benefits"** button.

3. Sign Up or Log In:

- If you don't already have a GitHub account, click **"Sign up"** and fill out the registration form.
 - Enter a username, email address, and password.
 - Verify your email address via the link sent to your inbox.
- If you have an existing GitHub account, log in.

4. Apply for the Student Developer Pack:

- Once logged in, go to the [Student Developer Pack page](#).
- Click **"Get your Pack"** and follow the instructions to verify your student status.
 - Provide proof of enrollment, such as a university-issued email address or a scanned copy of your student ID.
 - Fill out any additional details requested.

5. Wait for Approval:

- Approval may take a few days. You'll receive an email notification once verified.

Step 2: Install GitHub Copilot Plugin in PyCharm

1. Open PyCharm:

- Launch PyCharm on your computer.

2. Access Plugins:

- Go to **File > Settings** (or **PyCharm > Preferences** on macOS).
- In the settings window, select **Plugins** from the left-hand menu.

3. Search for GitHub Copilot:

- In the Plugins menu, click on the **Marketplace** tab.

- Search for **"GitHub Copilot"** and **"GitHub Copilot Chat"** in the search bar.

4. **Install the Plugin:**

- Find the **GitHub Copilot** and **GitHub Copilot Chat** plugins and click the **"Install"** button.

5. **Restart PyCharm:**

- After installation, you'll be prompted to restart PyCharm. Click **"Restart IDE"** to apply the changes.

6. **Sign In to GitHub Copilot:**

- Once PyCharm restarts, you'll see a pop-up prompting you to sign in to GitHub to use Copilot.
- Click **"Sign In"** and log in using your GitHub credentials.
- Authorize GitHub Copilot to access your account.

7. **Activate Copilot:**

- If you're eligible (e.g., as a student), GitHub Copilot will be activated.
- Test Copilot by starting to code; suggestions will appear as you type.
